

BRITISH SCHOOL OF GENEVA

FIRST AID POLICY

Introduction

First Aid can save lives and prevent minor injuries becoming major ones. This First Aid policy outlines the British School of Geneva's responsibility to provide adequate and appropriate First Aid to pupils and staff and the procedures in place to meet that responsibility.

Aims

- To identify the first aid needs of the school
- To ensure that first aid provision is available at all times while people are on the school premises and while on school visits.

Objectives

- To appoint the appropriate number of suitably trained people as Appointed Persons and First Aiders (Appendix A) to meet the needs of the school.
- To provide relevant training and ensure monitoring of training needs is reviewed annually.
- To provide sufficient and appropriate resources and facilities.
- To keep staff and parents informed of the school's First Aid Policy through staff and parent handbooks and the school's website.
- To keep accident records
- To give clear structures and guidelines to all staff regarding first aid and medicines
- To ensure the safe use, administration and storage of medicines in school and on off-site visits.
- To undertake a risk assessment of the first aid requirements of the school

Responsible Persons

- The Principal is responsible for putting the policy into practice and for developing detailed procedures.
- The Principal should ensure that the policy for first aid is available to all staff and parents
- In the event of a medical emergency and the school being unable to contact the parents / carers the Principal will act in 'Locum Parentis'.
- The school has an on-call Doctor in case of urgent need or consultation.

Appointed Person(s)

- Takes charge when someone is injured or becomes ill
- Looks after the First-Aid equipment – restocking the first aid container, ordering equipment
- Ensures that an ambulance or other professional medical help is summoned when appropriate
- Although Appointed Persons do not have to be First Aiders, British School of Geneva ensures that they have completed First Aid Training.

First Aiders

First Aiders should

- Give immediate help to casualties with common injuries or illnesses and those arising from specific hazards at school
- When necessary, ensure that an ambulance or other professional medical help is called

First Aid Equipment and Facilities

- A suitable room that can be used for the care of pupils should be identified. This area must contain a washbasin and should be reasonably near to a WC.
- The Appointed Persons, directed by the Principal, will ensure that the appropriate number of first-aid containers is available and restocked when necessary.
- All first aid boxes are marked clearly. The boxes are stocked with recommended and mandatory contents.
- First Aid boxes and equipment are taken on all school educational and sporting visits.
- Basic hygiene procedures must be followed by staff administering first aid treatment.
- Single-use disposable gloves must be worn when treatment involves blood or other body fluids.
- Hand sanitising gel should be made available.

Information on First Aid Arrangements

All staff members should familiarize themselves with the First Aid Policy. In addition, it is the responsibility of the Principal to inform all staff of:

- The arrangements for recording and reporting accidents
- The arrangements for First Aid
- Staff with First Aid qualifications
- Location of First Aid kits

Record Keeping and Reporting Accidents

- All minor injuries and First Aid treatments given are recorded in the treatment book kept in the First Aid room
- Parents are contacted by telephone and email if a child has received a bump to the head, or wasp or bee sting or a significant incident.
- In the event of a medical emergency and the school is unable to contact parents / carers then the Principal acts in 'Locum Parentis'.
- In addition in case of the following a detailed report should be written and sent to parents:
 - An accident that involves a staff member or pupil being incapacitated for more than 7 consecutive days
 - An accident which requires admittance to hospital for in excess of 24 hours
 - Major injury such as fracture, amputation, dislocation of shoulder, hip, knee or spine
 - An accident in school which requires immediate emergency treatment at hospital

Transport to hospital or home

The Principal will determine a reasonable and sensible action to take in each individual case. Where the injury is an emergency, an ambulance will be called following which the parent will be called. Where hospital treatment is required but is not an emergency, the Principal will contact the parents for them to take over responsibility for the child. If the parent cannot be contacted then the Principal may decide to transport the pupil to hospital. Where the Principal makes arrangements for transporting a child then the following points will be observed:

- Only cars insured to cover such transportation will be used
- No individual member of staff should be alone with a pupil in a vehicle
- The second member of staff will be present to provide supervision for the injured pupil

Children with Medical Needs

- Children with medical needs have the same rights of admission to the school as other children and in most cases, will be able to take part in normal activities with support.
- Parents / carers have the prime responsibility for their child's health and should provide the school with information about the child's medical condition
- A list of students with medical needs should be uploaded on e-learn to help staff access the information and take necessary safety measures and ensure that they and others are not put at risk.

Administering Medicines in School

There is no legal or contractual duty on staff to administer medicine or supervise a child taking it. If a child is taking a prescribed medicine it is the parent's / carer's responsibility to come to school and administer the medicine. In exceptional circumstances, a First Aider will administer prescribed medicine providing that a 'Personal Agreement' (Appendix B) has been signed.

- All prescribed medicines that are due to be administered must be kept in the school office. They should be provided in the original container with the name of the pupil clearly marked
- These medicines should be stored in a secure place and not in First Aid boxes
- It is the child's responsibility to come to the school office for the medicine to be given, the school does not accept responsibility if the child forgets
- Records will be kept of all the prescribed medicines administered
- Non-prescribed medicines are not allowed in school

Special circumstances

Head injuries: The school recognises that accidents involving the pupil's head can be problematic because the injury may not be evident and the effects only become noticeable after a period of time. Where emergency treatment is not required, all bumps to the head will be reported to parents with via phone / email by appointed persons.

Asthma treatment and inhalers: A list of students suffering from asthma should be accessible on e-learn for all staff members. Asthma sufferers in secondary school are permitted to bring their own treatments

to school provided a 'Request for child to carry his / her own medicine' form (Appendix C) has been completed by the parents / carers. In case of primary children the inhalers / medicines are handed over to the appointed persons along with the completed parental agreement (Appendix B). The medicines should be kept in the office in clearly labelled boxes with the students' names. Treatment is supervised by an adult and noted in the records and parents informed via email. Asthma treatments are taken on off-site visits. Parents are responsible for checking that the medications are within the expiry period.

Epipens: A list of students suffering from anaphylaxis should be accessible on e-learn for all staff members. Each anaphylactic sufferer has an individual protocol to follow. The epipens along with a completed 'Request for child to carry his / her own medicine' form (Appendix C) should be kept in the office in a labelled box with the child's name and class and should be readily available. In case of an emergency, epipens should be administered by members of staff who have received epipen training, if possible. Parents are to be notified immediately and an ambulance called for. The date and time of the treatment are to be recorded. Parents are responsible for checking that the medications are within the expiry period.

Administering First Aid Off Site

- First Aid provision must be available at all times including off site visits. The level of first aid provision for an off-site visit will be based on risk assessment
- A trained first aider will accompany all off site visits with a suitably stocked First Aid box
- The First Aider must be aware of the contents of the First Aid box and its location at all times throughout the visit
- All adults present on the visit should be made aware of the arrangements for First Aid.
- If any First Aid treatment is given the Group Leader will advise the school office by telephone if urgent, or on return so that the pupil's parents can be informed.
- If a pupil is taking a prescribed medicine, a 'Parental Agreement' form will have been completed
- A copy of the Parental Agreement form will be taken along with the relevant medication on the visit. The medication will be kept in the First Aid box and will be administered by the First Aider at the necessary time and recorded.
